

Full name:

What will happen in the future ?

Three English teenagers share their thoughts on what they think will happen in the future.

Hi, my name is [Name], I'm [Age] years old and I live in [Location]. I think that [Thought] will happen in the future. I think it will be like a science fiction story, but only better!

Hi, I'm Mike, I'm 14 years old and I live in Manchester, in the U.K. I think the world will look very different in the future. I think that we will improve space travel and we will discover a lot of new planets. I also think that we will

I think we will invent flying cars, so there won't be long traffic jams any more. We will also have different types of flying cars, some will fly from country to country and some will take us to visit other planets! So instead of going for a Sunday drive with my parents in the countryside, we'll go for a drive to the moon! We'll also invent time-machines, so we will travel back and forward through time.

build many spaceships and maybe even low-cost companies like Ryanair will run a space shuttle service to the moon! I mean, if Richard Branson and Virgin Airlines can offer space travel for the wealthy and famous then why not Ryanair offering cheap flights to Mars?

Of course, with all these space travels, I think we will meet extra-terrestrials and they will come and live on our planet. Who knows, maybe in 50 years some of my neighbours will come from another planet.

Hello, my name is Lisa, I'm 14 years old and I live in Newcastle, in the north of England. I think the future will bring lots of technological advances. I think we will all have our own personal robots at home so we won't have

to do the washing up, the ironing and all the other household chores.

I think there will be special robots to go to the supermarket to buy all the groceries and transport them home, where of course they will also do all the cooking!

We will speak at least five different languages and we won't learn them, we'll be born that way! School exams will never be the same; we will have clones to send in to do our exams while we stay at home in bed!

I also think we will see great improvements in medicine. We will find a cure for cancer and for all other illnesses and we will all live 150 years!

I also think that we will go and live on other planets. When there are no more natural resources left on Earth, it will be necessary to look for them on other planets.

A) Read the text and fill in the following table:

People	Ideas for the future
 <p data-bbox="280 555 373 595">Steve</p>	<ul style="list-style-type: none"> - - - -
 <p data-bbox="296 913 363 954">Lisa</p>	<ul style="list-style-type: none"> - - - - -
 <p data-bbox="296 1317 373 1357">Mike</p>	<ul style="list-style-type: none"> - - -

B. What do you think? Are these things possible or not? Circle the possible ones !

Flying cars

Time-machines

living on other planets

Personal robots

living 150 years

Clones

Cheap space travels to other planets

To meet aliens

Good luck 🍀
